

ENDURICA PRESENTS RUBBER FATIGUE SIMULATION SOFTWARE

Endurica's fatigue solvers show how your design will endure in specific application scenarios within all three major nonlinear finite element codes: Abaqus, Ansys and Marc.

Endurica's software is the first (and only) commercial FEA software to predict when and where cracks will show up in an elastomer product with complex loading history and geometry. Endurica's methods are in use across the globe by virtually all industry sectors.

BENEFITS

- Save the costs of build and break experiments for well-qualified designs.
- Quickly see how changes to material behavior, part geometry, or load history influence fatigue life.
- Inform design decisions with a patented tool that has been continuously developed for more than a decade, and successfully validated against a wide range of benchmarks and real-world problems.
- Find out where your part might develop a crack, how long it can be expected to endure, which events are damaging and which are harmless.
- Communicate effectively about durability issues with realistic, physics-based presentation of simulation results.

C-SUITE INSIGHTS

.....

DURABILITY WINS NEW BUSINESS

Show your customer who is the boss of durability. Let us help you win their business.

RIGHT THE FIRST TIME SAVES BIG

Missing the durability qualification resets your development cycle and puts you back big time. Let us support your people with our tools and expertise.

GET THERE FIRST

Getting design decisions right for durability will get you to market faster.

START WITH QUALITY

Don't let poor durability turn into costly reliability or warranty issues.

FUTURE PROOF YOUR BUSINESS

Ask about our Digital Twin capabilities. Get durability online for your IoT and Big Data applications.
